## EXPERIENCE

Mar 2019 - Present

Creating positive outcomes through design, I passionately craft beautiful, human-centred interactions - championing user needs in new business value propositions which are embracing emerging technologies to bring meaningful experiences to market.

Strategically iterating solutions in agile, cross-functional, product teams to accelerate profitable growth excites me the most.

I set the vision for end-to-end user experiences into reality through workshops, UX research, metrics, pixel-perfect designs

and prototypes using tools like Miro, Sketch, Principle, Invision or Adobe Creative Suite.

Keen on voice interfaces and services embedding data intelligence (Ai/ML) that empower apps and incorporate analytics to measurably improve engagement.

Learning to be data-aware in my approach to help teams evaluate the most effective, usable and releasable design for end-user.

Recommendations from team members I've directly worked with available on [LinkedIn](https://www.linkedin.com/in/jaysuthar).

### SENIOR UX/UI DESIGNER

[Hi Mum! Said Dad. \(HMSD\)](#)

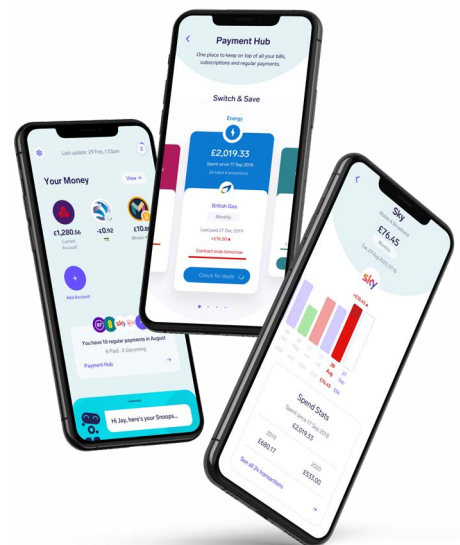

Digital product and innovation agency

Helping clients through the product development process on new customer propositions across voice, responsive web and native apps. Key highlights:

#### Design lead iOS/Android fintech app, [SNOOP](#)

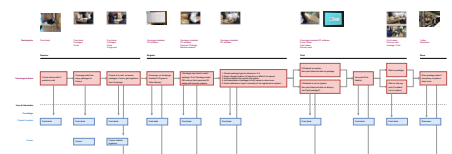

Integrating open banking with machine learning, Snoop turns customers' transaction data into intelligent insights and provides a personalised means to monitor, manage, save money across their personal finances. In the first 6-months of launch:

- Top 50 European / No.5 in top 100 UK disruptive Fintech start-up business
- Over 115,000 downloads, with 75% registered customers and £7.5bn analysed
- Customers annually saving £130 or more
- Commercial team successfully reaching monthly revenue targets
- 4.0 rating on [App](#) & [Google Play](#) store

#### Voice experience designer, [Audible + Alexa](#)

Prototyped Alexa skills for an engaging design studio workshop. I auditioned ways Alexa users could discover new, Audible content that generate revenue and help guide the 2019 skills program roadmap.

#### Operation analyst, [Greenwich Peninsula](#)

Conducted discovery sessions, ethnographic research and contextual inquiries with staff/stakeholders to capture real-time business operation insights into 23 service blueprints reflecting key process and improvements.

## JAY SUTHAR, EXPERIENCE CONTINUED

Jan 2018 - Mar 2019

SENIOR PRODUCT DESIGNER, IOS & ANDROID APP  
 YOTI (Your Own Trusted Identity)

Secure digital ID start-up - safer way to prove your identity and credentials, online or in person

Diving right in to steer progress at speed with product owners across multidisciplinary feature teams. At times, delivering in fluid 'discovery' bursts during sprints, adopting business and technical constraints, to present detailed user interaction journeys at team walkthroughs, prototypes for usability testing or launch fortnightly product features.

Established a closer way of working with product teams so we collectively set expectations in building the right thing in the right way. Mentored designers in skills and processes.

Aug 2011 - Jan 2018

SENIOR DESIGN CONSULTANT

Reply

Open Reply - eCommerce and digital experience agency

Entrenched with clients on site (UK/Europe), leading members with empathy, transforming high-level requirements from product owners, business analysts, solution architects to creative directors into strategic, user-centred, web, app or enterprise solutions for **Sony PlayStation, BNP Paribas, The Body Shop, Berry Bros. & Rudd Wines, Rolls-Royce Aerospace Engines, UK Ministry of Defence (Defence Equipment & Support), UK Home Office (Visas & Immigration), Monsoon Accessorize, Aveda, Delhaize, Dunlop Motorcycle, O2, Ideal Standard Group.**
